Surveillance Systems and Hidden Cameras

Do you want to see what's going on when you're not there?

Hidden Cameras

These everyday items have tiny cameras hidden in them. They are easy to use and easy to install. Use these hidden cameras to protect your property at your home, office, your children, and your pets to give you peace of mind. Many of them are very portable, easily moved from room to room or place to place. Any of the DVRs we carry (pg. 20) will work with these cameras and get the cables, connectors and signal boosters (pg. 26 & 27) you need too. All of them are hand-crafted in the USA. Our wireless cameras can transmit up to 1000 feet - over 3 times the distance of most wireless cameras on the market. High Power is available with most 2.4 GHz transmitters and will increase transmission distance up to an additional 1500 feet - increasing your wireless transmission up to 2500 feet. Black and white cameras feature .003 Lux which allows best possible images in almost complete darkness. Camera requires some ambient light (night light, television).

ALARM CLOCK HIDDEN CAMERA - Sleep peacefully with the Alarm Clock hidden camera. A fully functional FM/AM radio alarm clock with large LED display. Includes a single alarm, easy-to-see alarm indicator, sleep button and alarm volume control. Full power back-up in case of electricity loss. Red tuning needle is fixed in place to prevent camera obstruction, but radio station can still be adjusted with tuning dial.

- Only wireless cameras include **free** 2.4 GHz receiver (a $160.00 Value)
- Black & White Cameras feature .003 LUX which allows best possible images in almost complete darkness. Camera requires some ambient light (night light, TV)
- High-Power (HP) will increase transmission distance up to an additional 1500 ft, increasing your wireless transmission up to 2500 ft
- See page 16 for the self-contained, built-in DVR version.

HC-ALC32-DVR • $527.00 Clock Radio Hidden Camera with Built-in DVR

WALL CLOCK HIDDEN CAMERA - This new designer totally self contained wall clock hidden camera has a built-in motion activated DVR, 1/3" SONY CCD camera image sensor for clear video. Best of all it also supports up to a 32 GB SD card allowing for days of recording. Combine this with its motion activation feature and you're sure to only capture actual events, eliminating the need to potentially have to sift through hours of empty room footage.

Features: Functional wall clock, Memory full overwrite feature allows for continuous recording with no need to swap out SD cards, SONY CCD camera, Remote control operation, Motion detection, Resolution: 520 TV Lines, Recording time: 64 hours before filling up a 8GB SD card, Lux rating: 0.1 LUX, Diameter: 13", Power supply: DVR: 12 V AC, Clock: 1 AA Battery

Includes: Wall Clock, Remote control, Instruction Booklet, 2 AAA Batteries for remote control, 8 GB SD Card (Supports up to 32 GB SD Card)

HC-WALLC5-DVR • $517.00 Wall Clock Hidden Camera with Built-in DVR

IPOD HIDDEN CAMERA DVR DOCK STATION - What better way to wake up or go to bed than to your favorite tunes? This sleek clock radio wakes you gradually and lulls you to sleep with your iPod music or AM/FM radio or buzzer. It does all this while charging the iPod with a built-in dock connector, so it's ready to go when you are! Even better is the hidden camera inside.

Features: Adjustable sleep timer, uses Apple's universal dock, compatible with iPods with dock connector & plays docking iPod models, EQ controls treble, bass and balance, Aux audio input, High-fidelity stereo drivers in specially designed Reson8™ speaker chambers, remote control interfaces with iPod *and* radio, Extension Speaker Jack (Speaker sold separately) for expanded stereo sound.

Specifications: SONY CCD Image Sensor, Picture Elements: EIA/NTSC: 512 × 492 - CCIR/PAL: 512 × 582, Resolution: 480 TV Lines, Minimum Illumination: 0.001 Lux, Lens: 3.7 mm Pinhole Lens, Power Supply: DC 12 V. ***Not compatible with 3rd generation or earlier iPods***

Includes: Dock Station, RCA TV/Monitor connector cable, Remote control, Instruction manual

HC-IPODD-DVR • $469.00 iPod Hidden Camera with Built-in DVR

This fully functioning **MINI DESK CLOCK HIDDEN CAMERA** can be used almost anywhere you go. Place it anywhere in your home to catch a cheating spouse or abusive nanny. Record activity in your hotel room while you're out. All controls are located on the bottom of the clock base.

Features: Color Camera 300K Pixels, Functioning clock, Video Format AVI, 15 fps, Resolution 640 × 480, Memory 4GB Internal, Video Recording with time and date stamp on display playback, USB 2.0, Built-in rechargeable Li-Battery, Last approximately 1.5 hours per single charge, Dimensions 1⅞" × 1¾" × ⅝", No driver needed if the operating system is Windows ME/2000/XP or above.

HC-CLOCK-DVR • $128.00 Mini Desk Clock Hidden Camera Built-in with DVR

The **PIR MOTION DETECTOR HIDDEN CAMERA** with built-in DVR is the best on the market. It doesn't just look like an alarm system's motion detector but functions as one too! It has an alarm output so you can connect it right to your alarm system, and use it as an alarm sensor as well as a hidden camera. Furthermore, its motion detector activates the camera too; recording only when something passes, sparing you from watching hours of uneventful footage. Footage records directly to an 8 GB SD card (included).

Specifications: Lens 1/3 SONY Color CCD Camera, Picture Elements: EIA/NTSC: 512 × 492, Resolution: 420 TV Lines, Minimum Illumination: 0.1 Lux, Function: Alarm Output, Lens: 3.7 mm Pinhole Lens, 640 × 480 video recording, Capture hidden camera video footage in extreme low light situations, 420 vl 0.1 lux super high quality SONY CCD image sensor, Supports up to 32 GB SD (max)

Includes: Motion Detector with DVR, Remote control, 12 V power adaptor, User Manual, Bracket and Screws, Batteries for Remote Control, 8 GB SD Card

HC-PIRMD-DVR • $424.00 PIR Motion Detector Hidden Camera with Built-in DVR

MOTION DETECTOR DVR HIDDEN CAMERA - When someone intrudes it will start recording/photographing automatically - AVI recording and JPG snap optional - Overwrites when memory is full. Has 128 MB built-in flash memory but will support 8 GB SD card (optional). Real time clock records the time for every video/picture. Review the video and browse pictures via a computer monitor or TV. Also has night vision for use in dark conditions.

Specifications: TV Mode: PAL / NTSC, Internal ⅓" SONY CCD camera, Horizontal resolution: 420 TV Line, Trigger for record= Motion detection, Trigger for alarm= Motion detection + PIR detection (optional), Power supply: DC 5 V, PIR detection distance= 8M, View angle = 120°, AVI Resolution 320 × 240; JPG resolution 640 × 480, Memory: Flash memory and SD Card (up to 8 GB), Data code: D1 low, D2 high, D3 empty, D4 empty, Wireless frequency: 315 MHz/433 MHz (optional), Li-Battery capacity: 1800 MAH, Battery recharge >6 hours; Battery discharge >3 hours, DC 5 V, 1.5 A, RC distance= 8 M, IR distance: 5 M - 8 M; IR. 8 GB SD card using time: AVI video recording for 8-10 days, snapshots for 25 days

HC-MOTION-DVR • $242.00 Motion Detector Hidden Camera with Built-in DVR

SMOKE DETECTOR DVR HIDDEN CAMERA - Every house, apartment and business should have a smoke detector (or two). The Hidden Camera Smoke Detector/DVR Combination is a perfect solution for covert video surveillance. No wires to run, or tricky transmitters to deal with; just high-quality all-inclusive recording. Monitor cash registers, record office personnel, or monitor who comes and goes through the door. Mounts on ceilings or walls in minutes and can be moved to different locations quickly and easily. *See page 7 for the Wi-Fi Hidden Camera*

Features: Fully Functional Smoke Detector, High Quality Color 1/3" SONY CCD Camera, SD Card Memory Support 8 GB SD card included (supports up to 32 GB SD card), Remote Control for "one touch" operation, Motion Activation, No Additional Software Required, Video Resolution: 520 TV Lines, Minimal Illumination: 0.1 LUX (Low Light), Power Supply: DC 12 V, Requires AC Connection - Adapter Included

Includes: Smoke Detector, User Manual, 8 GB SD Card, Remote Control, 2 AAA batteries, RCA Cable for testing.

HC-DNVSM-DVR • $503.00 Smoke Detector Hidden Camera with Built-in DVR

The **REARVIEW MIRROR CAMERA** doubles as a video/audio recorder and a DVR. It has a ¼" digital CMOS Color Camera built-in and uses an included 8 GB SD card. The built-in color camera rotates 330°; face it forward to see the road or turn it around to view inside the car. Also includes a wireless external camera for the rear dash or the outside of the car. A 3.6" TFT LCD (Thin Film Transistor Liquid Crystal Display) monitor on the mirror allows you to instantly playback video and watch it in real-time 30 fps. Includes a built-in rechargeable battery or you can run it off your car's auxiliary 12 V cigarette lighter or by using the included USB cord. The mirror installs easily into your car by clipping onto your existing rear view mirror. Battery life is approximately 3 hours.

Camera Specifications: Imaging Sensor = ¼" Digital Color CMOS, Resolution= 420 TV Lines, Pixel= 640 × 480 (NTSC) / 320 × 240 (PAL), Manual Adjust Focus, Minimum Illumination= 0.1 Lux, View Angle= 90°, Operating Range= 100 M

DVR Specifications: Frequency: ISM 2,400 - 2,483 MHz, Work current = 500 mA, Compression Format= MPEG4 H.264, AVI Video Resolution = 640 × 480 (NTSC), fps/Second= 30 fps (NTSC), Internal Memory = 32 MB, Maximum SD Capacity= 16 GB

Includes: User Manual, 8 GB SD card, Car Charger, USB Cable, Rear View Camera with IR.

HC-RVM • $425.00 Rearview Mirror Hidden Camera with Built-in DVR

The **MINI DVR HIGH DEFINITION CAR DASH CAMERA** works great as an Accident Recorder, Evidence Collector, and Criminal Catching Device. With the multi-purpose bracket, its usefulness can be more widespread; suitable for meeting recording, monitoring, outdoor scene photography, evidence collection photographing, and car surveillance.

Features: Advanced voice, video recording, and playback; User-friendly design, Very Portable, 2" LCD screen to view footage right from the device, hooks up to a computer for easy footage download.

Specifications: Pixel= 8.0 Mega pixels CMOS, Angle of view= 72°, Min. illumination= 1 Lux, Continuous video recording time= 4.5 hours, Voice control standby time >100 hours, Memory Card= 8 GB SD (supports up to 32 GB), Video recording form= AVI, Resolution= 640 × 480@ 30 fps, USB connection= Mini5Pin USB 1.1/2.0, Memory= 1 GB 35 minutes, Charging Time~ 3 hours

Includes: Hi-Definition Camera, Manual, Mounting Bracket, Cigarette Lighter Charger, AV Cable, SD Card 8 GB.

HC-DASHC-DVR • $168.00 Car Dash Camera with Built-in DVR

These weatherproof LED **SPOT LIGHT COLOR HIDDEN CAMERAS** have built-in DVRs and are perfect for outdoor applications. They use a 2.0 mega pixel color digital camera to capture time and date stamped video when motion is detected. When motion is detected at night the powerful 80 LED spotlight automatically turns on. Holds an 8 GB micro SD Card (included) holding ~5 hours of video footage. The spot light camera comes in both large and small sizes.

Features: Motion Activated Camera/ Security light, Auto Lighting and motion detection, Auto overwrite when the memory is full, 24 hour Standby.

Specifications: Image sensor= 2.0 mega pixel color, Memory= Support Max 32 GB SD Card, Digital Video Capture - 640 × 480 pixel, View Angle = 120°, USB 2.0 and USB 1.1 compatible, Detection= PIR Auto-detection-Auto light on, Recording Mode 10 second AVI video capture, Video Record Speed= 15 fps, AVI, Image resolution 640 × 480 pixels, DC 5 V/1A, View range 90 feet for HC-SPLLG-DVR and View range 80 feet for HC-SPLSM-DVR , Dimensions= 6.9" × 5.1" × 4.7" for HC-SPLLG-DVR and 6.9" × 4.9" × 3.25" for HC-SPLSM-DVR

HC-SPLLG-DVR • $204.00 Large Spot Light Hidden Camera with Built-in DVR
HC-SPLSM-DVR • $187.00 Small Spot Light Hidden Camera with Built-in DVR

This is an **INFRARED LED FLASHLIGHT HIDDEN SPY CAMERA WITH LASER POINTER**. It is the perfect tool for those who want to see what secret things are going on in the dark. This item is great for security guards, police, hunters, and anyone with low light recording needs. The camera lens is located in the center of the Flashlight. It has a unique design, very easy to use, and is multi-functional. The 8 GB Micro SD Card ensures long time recording. The Infrared LED flashlight is small and compact so it can be concealed easily as well. Dimensions= 4 ⅜" long 1" wide

Features: Audio and video synchronized recording, Built-in 2.0 Mega pixels high definition digital camera, Video resolution= 1280 × 960, AVI format, Built-in Li-battery (800 mAh), Storage= micro SD card up to 32 GB, Image Sensor= 1/4 COMS, View Angle= 70°, Video Resolution= 1280 × 960 pixels, Photo Resolution= 1600 × 1200 pixels, Recording Frame= 30 fps, Video working time= about 5 hours, LED /Video synchronal working time= about 3 hours, Charging time= 3 hours, Laser light (1 pcs) working current: 30 mA

Includes: IR LED Flashlight DVR, Adaptor, USB Cable, CD, User Manual, 8 GB Micro SD Card

HC-IRFLC-DVR • $120.00 Infrared Flashlight Hidden Camera with Built-in DVR

LED FLASHLIGHT HIDDEN SPY CAMERA - The perfect tool to see what secret things are going on in the dark. Great for security guards, police officers, hunters, and any low light recording needs. The camera lens is located in the center of the flashlight; easy to use and high-quality recording. The Flashlight is small and compact so it can be concealed easily. Dimensions= 4 ⅜" long 1" wide

Specifications: Resolution= 720 × 480 video output, Frame Rate= 30 fps, Video Format=AVI, Power Supply= built-in Li-Battery, Power Duration= 3 hours, Supports recording high-definition video in the low illumination, Storage= Micro SD card, Supports up to 16 GB, Simultaneous photography and charging, Supports USB 1.1 and USB 2.0, Made of stylish and wear-resistant alloy

Includes: LED Flashlight Hidden Spy Camera, USB Cable, Power Adapter, CD, User Manual, Wrist Strap, 8 GB Micro SD Card

HC-FLCAM-DVR • $112.00 LED Flashlight Hidden Camera with Built-in DVR

CAR KEY HIDDEN CAMERA - Looks just like a remote car key but is really a hidden camera with audio and a built-in mini DVR. No drivers or outside power source needed. It will charge plugged into your computer with the included USB cord. It holds 8 GB of footage which you can watch on practically any media software that supports AVI files. This is over 3 hours of recorded material before you need to delete or download. Just view on your computer. The battery will last up to 2 hours on a single charge.

Specifications: Video format = AVI, Video Resolution = 640 × 480, Camera Resolution = 1280 × 960, Battery = 280 mAh 3.7 V, 29 Frames Per Second (fps), Dimensions = 2" × 1¼" × ⅜"

Includes: Car Key DVR, USB Cord for recharging and transferring video/photos, User manual, Gift Box

HC-CARKY • $175.00 Car Key Hidden Camera with Built-in DVR & Audio

Front

The new **CELL PHONE CAMCORDER** is the first of it's kind. It is the first to have HD Video Function, HD Image Capture, Quality Audio, Motion Detection, and Digital Voice Recording Control. Its use is suitable for: reporters, emergency records, personal records, recreation, sports film, recording teaching aids, home security monitoring, law enforcement forensic evidence, travel, outdoor adventure, uses a 8 GB Micro SD Card (included).

Features: Recording video & audio, Photos, Motion detection, Record audio alone, Playback, Webcam, USB drive functionality

Specifications: Video Format, AVI: Image Format, JPG: 640 × 480, Video Resolution = 1280 × 960 30 fps, Support System Windows 2000, Windows XP, Windows 2003, Windows Vista, Mac, Recharge Voltage DC 5 V, Transfer Interface USB, Battery Li-ion Battery ~ 7 hours, Max Memory: 16 GB

HC-PHONE-DVR • $192.00 Cell Phone Hidden Camera with Built-in DVR

We have a huge selection of surveillance equipment to choose from. But, if you ever need something we don't stock or have a special request, just ask. We will do our best to get you what you need.

Frequently Asked Questions

WHAT IS A WIRELESS SECURITY CAMERA? Most security cameras require two wires: one for power, and one to transmit the captured video to a display or recording device (TV or DVR, for example). Wireless cameras only require one wire - for power. The video is transmitted wirelessly via transmitter and receiver devices. A wireless camera is really a combination of the camera plus a built-in wireless transmitter to send the video, and a receiver to receive the video, which in turn plugs into the monitor or recorder.

FOR WHAT APPLICATIONS SHOULD I CONSIDER IP? IP cameras should be considered for large installation sites that already have a high bandwidth network installed - especially if the cameras will be spread out over a wide area. For example; Hospitals, Schools, etc.

WHAT FEATURES SHOULD I LOOK FOR IN A CCTV DIGITAL VIDEO RECORDER (DVR)? All DVRs are definitely not made equal! There are several factors that are critical to consider when purchasing a DVR, especially when comparing price. The most important features to look at are the number of cameras supported, frames per second (fps), compression technology, hard drive space, network connection / remote viewing capability, motion detection, scheduling, and ability to save video and audio to a CD or flash drive.

USING RG59 CABLE VS. PLUG AND PLAY CABLE? There are two basic approaches to hooking up security cameras and digital video recorders (DVRs). You can use Plug and Play cable or you can use RG59 Siamese cable. Both cable types combine a cable for the video and a cable for the power. The advantage of plug and play cable is that it is very easy to use. The connectors for power, video and audio are all pre-attached. All you have to decide is what length you need (we offer 25, 50, 100, and 150 ft. models). This cable type is a good choice for homeowners who don't need a cable run longer than 150 ft. The RG59 Siamese cable is more heavily shielded so it's more durable and can be run longer distances (up to 1000 ft without a repeater). Its heavier shielding makes it less susceptible to interference. Florescent lighting in particular can interfere with camera signals. The RG59 is purchased in 500 or 1000 ft. rolls and each camera run is cut to the exact length needed. Since you need to cut the cable and attached the connectors, it is a little more involved to install.

WHICH TYPE OF SECURITY CAMERA SHOULD I USE? A security camera can come in many different styles including dome, bullet, infrared and Hidden. The security camera that will work best for your application will depend on several factors such as whether you will use the security cameras inside or out, during the day, nighttime, or both.

Bullet style security cameras are the most popular. They can be used inside or out. These security cameras come in black and white or color and come with all of the required mounting hardware. The security cameras casings are weather resistant and don't require added external protection. Most security cameras have a fixed 4 mm lens that allows you to see facial features out to about 35 feet and provides a 70° angle of view. Resolution levels for black and white security cameras are about 400 lines, any higher and the benefits are minimal. For color cameras, the higher the resolution the better.

Infrared security cameras are also very popular as they allow an image to be seen in little or no lighting conditions. Most infrared security cameras are bullet style and can be used inside or out. The cameras have infrared lighting installed around the outer edge of the lens which allows the security camera to see in no light 25 ft or more depending on the camera model - even further with a little bit of light (like street lighting or an outside light.)

Dome security cameras basically provide a different look. Also, if you have any concerns about tampering, check out our Infrared Armor Dome Security Camera. It will withstand a 10 lb sledgehammer blow and can be used inside or out, daytime or nighttime. Hidden cameras are very popular and can be hidden in almost any item. These cameras allow you to have the ability to capture video without anyone knowing. Most hidden cameras cannot be used outside and will need to be used indoors.

CAN I GET AUDIO IN MY HIDDEN CAMERA? No you cannot. According to United States federal laws, audio should not be used in a surreptitious manner. One example of surreptitious interception is audio in a hidden camera. This includes pinhole board cameras and all covert or hidden cameras. Audio in a hidden camera or board camera is only available to law enforcement agencies, with the exception of body worn cameras. Title 18, Section 2512.

WHAT IS A WIRED SECURITY CAMERA? Wired cameras have a video cable that runs from the camera to your recording or viewing device such as a DVR or monitor. Wireless cameras have a built-in transmitter that sends the video signal to a receiver. The receiver connects to your recording or viewing device.

HOW MANY WIRELESS CAMERAS CAN YOU HAVE IN ONE LOCATION? You can have up to four wireless cameras in one location. You can view all cameras at once using four receivers or you can use one receiver and switch to each camera. You will only be able to view one

camera at a time if you only use one receiver. If you want to install multiple wireless cameras in one location it's best to order them at the same time so that we can put them on different channels.

WILL A CORDLESS PHONE INTERFERE WITH WIRELESS CAMERAS? Cordless phones that operate on the 2.4 GHz frequency will cause interference with 2.4 GHz cameras. Interference should be minimal and usually occurs if the phone is between the camera and receiver. Wireless Internet, networks and Wi-Fi can cause interference too.

HOW FAR CAN A WIRELESS HIDDEN CAMERA TRANSMIT? Standard wireless hidden cameras can transmit up to 1000 feet and high-powered wireless hidden cameras can transmit up to 2500 feet.

DO THE RECEIVERS WORK THROUGH WALLS UP TO TWO FEET THICK? Yes, as long as there isn't too much metal in the wall.

HOW MANY HOURS WILL A DVR RECORD? The amount of time a DVR will record is based on the size of the DVRs hard drive, the number of cameras recording and the frames per second. Our stand alone DVRs uses 3.4 GB per camera per day. A 4 camera stand alone DVR with a 250 GB hard drive will record for 18 days. An 8 camera stand alone DVR with a 250 GB hard drive will record for 9 days. A 16 camera stand alone DVR with a 500 GB hard drive will record for 9 days.

WHAT IS A PLUG AND PLAY CONNECTION CAMERA? It is an RCA Video plug and a power plug on the camera for easy connection to DVR or TV. This is done by running the RCA (Aux) line into the VIDEO IN of the DVR or TV.

DO THE PLUG AND PLAY CONNECTIONS REQUIRE EXTRA WIRE TO RUN THE SIGNAL BACK TO THE DVR OR TV? Yes, you need to buy the length of cable you need. We offer the CA-25, CA-50, CA-100 and CA-150.

WHAT IS A VARIFOCAL LENS? A varifocal lens is one where the focal length of the lens can be varied. This is a fancy way of saying it is a zoom lens. Most varifocal lenses have, and in almost all circumstances should have, an auto iris feature.

WHAT IS A FIXED LENS? A fixed focal length lens cannot zoom. The focus is fixed. A fixed focal length lens usually allows more light to pass through the lens at a given focal length than a varifocal, or zoom lens. This can be important in low light situations.

Surveillance Definitions

RESOLUTION - Refers to how much detail can be captured on a camera or displayed on a monitor. Cameras typically capture about 380 horizontal lines of resolution. High resolution cameras may capture 450 lines of resolution or more. The higher the resolution, the more detail that can be captured in a picture. The monitors and recording devices can generally handle at least as much resolution as the cameras can capture.

IR - Infrared - IR LEDs are used on Day/Night cameras which allow the camera to see in the dark.

LUX - The measurement of low light needed for the camera to view and record properly.

FPS - Frames Per Second - the number of still frames (pictures) that give the illusion of motion, which appear in a single second. 30 fps is considered "real time". You need at least 30 fps for each camera for real time viewing or recording with your cameras.

NTSC - National Television Standards Committee; the analog video representation standard used in the US and South America. Compared to PAL.

PAL - Phase Alternating Line - the analog video representation standard used in Australia, and most of Europe and Asia. Compared to NTSC.

MOTION DETECTION - Refers to the feature in some VCRs and DVRs to only record video if something in the image moves or changes. Therefore you don't have to look through hours of taped video looking for something to happen. It also saves a lot of space on the tape or hard drive.

CODEC - A term referring to any technology used to compress and decompress large files such as audio and video files for efficient data transfer.

H.264 COMPRESSION - The latest MPEG4 compression technology, released in 2003. H.264 provides excellent video compression. You get the same quality image as MPEG4 even at the higher resolutions like full screen D1.

DIGITAL VIDEO RECORDER (DVR) - A digital video recorder is basically a computer that converts the incoming (analog) signal from the cameras to digital, and compresses it, and stores it. The DVR replaces the function of a multiplexor (or quad or switcher) and a security VCR. There are many advantages of digital video recorders over their analog counterparts.

Hidden Cameras with Built-in DVRs

All of the cameras on this page use an internal DVR that features: motion activated and scheduled recording; motion detection area masking; time and date stamp; high, medium and low recording options; remote control operation; and MPEG4 file format and composite video output. To control the features simply plug the camera into your TV, using the included RCA cable, point and click. All cameras come with a removable 8 GB SD Card and can support up to 32 GB SD Card for viewing on any device with an SD Card Reader.

Recording Quality (Tested w/ 8GB SD Card)		DVR Record Time		
Resolution	**Frame Rate**	**High**	**Med**	**Low**
640×480	12 fps	8 hrs	48 hrs	72 hrs
320×240	30 fps	16 hrs	96 hrs	144 hrs

EXIT SIGN HIDDEN COLOR CAMERA WITH BUILT-IN DVR - Exit Sign is fully functional it comes with a pig tail to be hard wired or you can attach a 3 prong plug to plug into a wall outlet

FREE 8 GB SD CARD Included
HC-EXITS-DVR • $471.00

ALARM CLOCK COLOR CAMERA WITH BUILT-IN DVR - Alarm Clock is fully functional, the red tuning needle is fixed in place to prevent camera obstruction. Radio station can still be adjusted.

FREE 8 GB SD CARD Included
HC-ALARC-DVR • $492.00

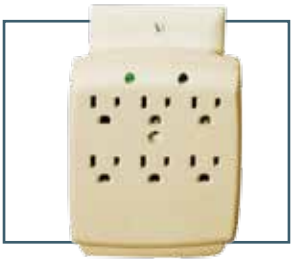
AIR PURIFIER COLOR CAMERA WITH BUILT-IN DVR - Air Purifier is fully functional. 8" × 8½"× 4½"

FREE 8 GB SD CARD Included

HC-ARPUR-DVR • $471.00

AIR FRESHENER COLOR CAMERA WITH BUILT-IN DVR - Does not function as an Air Freshener
5¼" × 6½"× 3"

FREE 8 GB SD CARD Included
HC-ARFSH-DVR • $471.00



ELECTRICAL OUTLET COLOR CAMERA WITH BUILT-IN DVR -Does not function as an electrical outlet

FREE 8 GB SD CARD Included
HC-OUTLT-DVR • $453.00

BOOM BOX COLOR CAMERA WITH BUILT-IN DVR - Boom Box is fully functional 14.5" × 9"× 5"

FREE 8 GB SD CARD Included
HC-BMBOX-DVR • $509.00

WALL CLOCK COLOR CAMERA WITH BUILT-IN DVR - Wall Clock is fully functional 11¼" in diameter

FREE 8 GB SD CARD Included

HC-WALLC1-DVR • $471.00

DESK LAMP COLOR CAMERA WITH BUILT-IN DVR - Desk Lamp is fully functional

FREE 8 GB SD CARD Included

HC-DSKLP-DVR • $514.00

TOWER FAN COLOR CAMERA WITH BUILT-IN DVR
- Fan is fully functional
12.25" × 4.9"× 5.4"

FREE 8 GB SD CARD Included
HC-WNDTN-DVR • $487.00

Multi-Channel DVR Systems

Whether you have a large or small area to secure, one of our DVR systems will work for you. Not only will this system digitally record video, but if you have Internet access you can see what is going on in real-time from anywhere in the world. Available in a wired or wireless version complete with cameras, a DVR and all necessary cables and components.

CS-DVR4CH • $1,049.00
4 Channel Wired Surveillance System

4 CHANNEL WIRED DIGITAL VIDEO RECORDING COMPLETE SYSTEM - This surveillance system allows you to install up to 4 wired cameras to digitally record all activity. This DVR has full networking capability and uses an embedded DVR which allows you to view live video on the Internet.

This complete surveillance system includes the following, *plus* mouse and remote:
(1) Stand Alone 4 channel DVR (SA-DVR-4, pg 20)
(4) Day/Night Color Wired Cameras (BC-30WC, pg 22)
(4) 100 Ft Video Cables (CA-100, pg 27)
(1) 17" LCD Monitor (LCD-17, pg 27)

If you bought these items separately this system would cost you **$1,656.00**. But by purchasing the complete system you only pay **$1,523.00** - a savings of ***$133.00***

If you would like to create your own system start with our 4 CH DVR then choose your cameras, cables and monitor.

- 2 Year Warranty on Complete Systems -

CS-DVR4CH-GC • $1,955.00
4 Channel Wireless Surveillance System

4 CHANNEL WIRELESS DIGITAL VIDEO RECORDING COMPLETE SYSTEM - This surveillance system allows you to install up to 4 wireless cameras to digitally record all activity. This DVR has full networking capability and uses an embedded DVR which allows you to view live video on the Internet. This 2.4 GHz Digital Wireless 4 Channel – H.264 DVR System has network function and uses MPEG4 and H.264 compression design. Its wireless camera has 24 IR LEDs for night vision, and its wireless DVR is designed for mixed use wired and wireless interface. Has a graphical interface and supports 3G Mobile Phones surveillance and E-mail function. Backup file supports windows media player.

Features: 4 Channel system 16AM/QPSK/BPSK digital modulation, 4 Channel Wireless or 2 Channels Wired optional H.264 DVR system with network function, Graphical Interface, Long recording time up to 40 days with 1 TB HDD @ 25 fps, Easy to Use, Camera has 24 IR LEDs for night vision, Supports dual coding stream, Supports network file sharing function, Supports 4 channel simultaneous playback, Supports 3G mobile phone surveillance and E-mail function, Transmission distance up to 300 feet (clear line-of-sight), Motion Detection, Sensor Activated, Timer, Playback Method= Normal Play, Fast Forward, Rewind, Single step,

Specifications: Video Format= H.264 and MPEG4 Compression, Image Sensor= 1/3" SONY Color CCD, Minimum Illumination= 0 LUX (24 IR LEDs on 30 feet), Lens= F 3.6 mm / 90 degree wide angle, Resolution= 420 TV Line, Video Input/Output Format= Output: 1 Ch BNC (composite), Storage Capacity= up to 1 TB HDD, Recording Time= Up to 20 days with 500 GB HDD at continuous recording mode @ 25 fps, Alarm Input / Output= 4 alarm inputs; 1 alarm output, Network Interface RJ45; Ethernet Auto Detect, USB 2.0 Interface, Flash Drive, Operational Range= Up to 300 feet (clear line-of-sight), Serial Interface Supports 1 RS485, Software= Supports USB firmware upgrade, Voltage Input / Output= AC:110-240 V input; DC:12 V/5A output, Power Supply= DC 12 V/1A (Camera); 12 V DC/5A (DVR), Operating Condition= Indoor & Outdoor use (camera); Indoor usage recommended (DVR)

Includes: Built-in removable HDD rack, Manual, Remote control or USB mouse operating

If you would like to create your own system start with our 4 CH DVR then choose your cameras, cables and monitor.

8 CHANNEL WIRED DIGITAL VIDEO RECORDING COMPLETE SYSTEM - This surveillance system allows you to install up to 8 wired cameras to digitally record all activity. This DVR has full networking capability and uses an embedded DVR which allows you to view live video on the Internet. All cameras, cables, monitor, remote and mouse included.

This complete surveillance system includes the following:
(1) Stand Alone 8 channel DVR (SA-DVR-8, pg 20)
(8) Day/Night Color Wired Cameras (BC-30WC, pg 22)
(8) 100 foot Video Cables (CA-100, pg 27)
(1) 17" LCD Monitor (LCD-17, pg 27)

If you bought these items separately it would cost you **$2,1610.00**, by purchasing the complete system you only pay **$1,415.00** - a savings of ***$746.00*** ***If you would like to create your own system start with our 8 CH DVR then choose your cameras, cables and monitor.***

Stand-Alone DVRs

These Stand-Alone Embedded Hard-Drives are fully self-contained with all of the necessary software already installed. A Digital Video Recorder (DVR) operates like a VCR yet it's easier to use and offers more options. The DVR converts analog video (NTSC or PAL) to digital data, and records it on a hard drive. Using a hard drive allows users to access recorded video instantly without having to rewind or fast forward video tape. Easily freeze-frame, fast forward or rewind without image streaking, tearing, or adjusting tracking. Digital video can be indexed by time/date or events, allowing users to easily search or reference past events. Access the features using either the front panel or from any computer. The rear panel has video and audio input/output.

4 CHANNEL EMBEDDED DVR

Features: H.264 Video Compression and Network Streaming, Multi-Lingual, USB Backup, Remote setup, monitoring, backup, alarm notification, remote software upgrade, multiple DVR consolidation, system configuration, support Windows 7, Vista, XP, and 2000, Internet Explorer/Firefox/Chrome/Safari: Remote monitoring, Programmable HTTP / Control / Data port, Mac OS supported for remote viewing. This system also works with smart phones including: iPhone, Blackberry, and Android.

All DVR functions controllable through remote access, 4 record quality settings, a Manual/scheduled/motion detection recording, Video Motion Detection, Video Loss Detection, 2 year warranty

Specifications: Video Format = H.264, Video Input = 4 CH composite BNC, Video Output = VGA & Composite BNC, Audio In = 1 CH RCA, Audio Out = 1 CH RCA, Storage= 500 GB HDD, Resolution = 720 × 480 (NTSC), 720 × 576 (PAL), Display Rate = Real Time 120 fps, LAN Connector = RJ45, Power= 12 V, Dimensions = 8½" × 8" × 1½"

Includes: IR Remote Control, USB Mouse, 4 Channel Embedded DVR

SA-DVR-4 • $510.00

8 CHANNEL EMBEDDED DVR

Features: Industrial durability shock resistance & stability, Records 8 channels simultaneously in high resolution (720×480), New H.264 compression (allows longer record time in same amount of space), Real time recording, USB backup, multi-lingual, live network playback capability, all DVR functions controllable through remote access, Easy to retrieve video, time and alarm information, easy to restore and power on in case of power failure, up to 8 wired cameras, 2 year warranty. This system also works with smart phones including: iPhone, Blackberry, and Android.

Specifications: Video input = 8 channel composite BNC, Video output = Composite BNC, VGA output, Audio input = 2 CH RCA, Audio output = 2 CH RCA, Alarm input = 8 CH, 3 Alarm outputs, LAN Connector = RJ45, PTZ Control = RS485, Real time 240 fps, Storage= 500 GB HDD, Power= 12 V, Dimensions = 11" × 10" × 3"

Includes: IR remote control, USB Mouse, 8 Channel Embedded DVR

SA-DVR-8 • $680.00

16 CHANNEL EMBEDDED DVR

Features: Industrial durability shock resistance & stability, Records 480 fps on all 16 channels simultaneously in high resolution (720×480), New H.264 compression allows longer record time in same amount of space, USB backup, multi-lingual, smart search and playback and operate network, all DVR functions controllable through remote access.

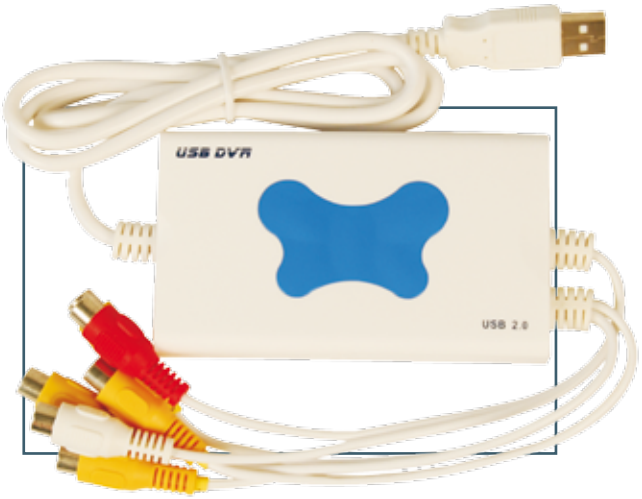
Streaming video for mobile phone or PDA, no apps required (iPhone, Android, & Blackberry supported) N-streaming internet/intranet remote access, DVD rewrite drive for burning recorded video to DVD, Easy to retrieve video, time and alarm information, easy to restore and power on in case of power failure, up to 16 wired cameras, includes mouse and remote control. 2 year warranty.

Specifications: Video input = 16 channel composite BNC, Video output = HDMI, Composite BNC, VGA output, Audio input = 2 CH RCA, Audio output = 2 CH RCA, Bidirectional Audio, Alarm input = 8 CH, 3 Alarm outputs, LAN Connector = RJ45, PTZ Control = RS485, Real Time 480 fps, Storage= 1 TB HDD, Power= 15 V, Dimensions = 17" × 15" × 3½"

Includes: IR Remote control, Mouse, 16 Channel Embedded DVR

SA-DVR-16 • $1,592.00

Video Recording



DVR-USB • $85.00 USB Digital Video Recorder

The **USB DIGITAL VIDEO RECORDER** is surveillance computer hardware that turns your home or office computer into a powerful, global-wide video surveillance system in 5 minutes or less. Connect this compact device to any desktop or laptop via USB port. Then you can record live video from the camera connected to the PC's hard drive. ***Will not work with Windows 7.***

Features: MPEG4 compression, records to HDD, USB DISK, ZIP Drive and CD/RW. Remote surveillance and PTZ control, user friendly interface, 5 levels of recording quality, compatible with; Intel P4 Celeron processor minimum 1700 MHz Motherboard Intel 845/865/915 series, HDD 80 GB minimum, RAM 256 MB minimum, Video Card GeForce2, GeForce4, FX5200, ATI Rage128 OS Windows 2000(SP4 above)/2003(SP1 above)/XP(SP2 above)/VISTA and Direct X 9.0 USB 2.0

Specifications: Input type: RCA, Video input: 4 CH, Audio input: 2 CH, Video output: 1 CH VGA, Display rate: 30 fps, Recording rate: 30 fps, Compression format: MPEG4, Video resolution: 640 × 480, 320 × 240, Record modes: motion, schedule, manual

Portable Video Recording

8 CHANNEL PORTABLE DIGITAL RECORDING SYSTEM

Perfect for Private Investigators, Building Contractors, Security Companies. This multi-channel portable DVR is a stand alone system. You can remotely configure this system through the Internet using the included software. Easily go from wireless to wired by just plugging in a cable. Can use up to 8 cameras including a combination of wired and wireless. Works with any of our security cameras.

Cameras not included.

Features: Industrial durability shock resistance & stability, new H.264 compression allows longer record time in same amount of space, multi-lingual, simultaneously record, playback and operate network , all DVR functions controllable through remote access, easy to retrieve video, time and alarm information, easy to restore and power on in case of power failure, up to 8 wired cameras or 6 wired and 2 wireless cameras, built-in 15" LCD Monitor, 1 year warranty (except battery). Mouse Included.

PSS-8CH • $2,834.00
Wired or Wireless Multi-Channel Portable System

Specifications: Video input = 8 Channel composite, LAN Connector = RJ45, Resolution Record = 240 fps (30 fps per channel), 500 GB, Continuous Power, 110/240 V AC and 2 hour backup battery, Camera Input: 8 - Inputs 2 wireless / 6 wired or 8 wired, Video System NTSC, Video Compression = H.264, Dimensions= 16" × 13" × 7".

Professional Cameras

High quality, high powered, high resolution, professional cameras give you great pictures while also being durable and capable of surviving the elements. Many have infrared and all are designed to function well in low-light.

LOW LIGHT OUTDOOR BULLET CAMERA

This high resolution bullet camera may be used indoors and outdoors and in low-light conditions. Fully weatherproof camera available in wired or wireless. Around 4" long from lens to rear.

Specifications: Image Sensor = ⅓" CCD (B&W), ¼" Color Interline CCD (Color), Resolution = 380 TV Lines, Min. Illum= .5 Lux/F 1.2 (B&W), 1 Lux/F 1.2 (Color), Lens: 3.6 mm, Micro lens, 12 V DC ± 10%, Consumption: 200 mA Max. ONLY wireless cameras include **free** 2.4 GHz receiver (a $160.00 Value)

B & W **BC-113W • $96.00** Weatherproof Wired Camera with Plug & Play
BC-113G • $247.00 Weatherproof Wireless Camera & 2.4 GHz Transmitter

Color **BC-113WC • $142.00** Weatherproof Wired Camera with Plug & Play
BC-113GC • $281.00 Weatherproof Wireless Camera & 2.4 GHz Transmitter

DAY/NIGHT COLOR CAMERA

This color bullet camera has a high quality digital CCD chip that automatically switches from color to black & white in low light conditions. To enhance low light visibility it has 30 built-in high infrared illuminators. Fully weatherproof. Comes with mounting bracket.

Specifications: Image Sensor: ¼" Color CCD, Resolution: 420 TV Lines / 470 TV Lines, Min. Illum. = 1 Lux f 2.0 (0 Lux; infrared on), Lens = 4.3 mm F 1.8 Board, DC 12 V ± 10%, Current Consumption = 110 mA (IR Off), 260 mA (IR On), 320 mA Max. ONLY wireless cameras include **free** 2.4 GHz receiver (a $160.00 Value)

BC-30WC-DN • $87.00 Wired Day/Night Professional Bullet Camera
BC-30C-DN • $283.00 2.4 Ghz Wireless Day/Night Professional Bullet Camera

DAY/NIGHT CAMERA WITH 56 INFRARED LEDS

This camera is for outdoor use and low-light situations. This day/night color camera has 56 infrared LEDs which allow you to see and record in total darkness. Wired and wireless models available. Comes with mounting bracket. Weather/tamper proof IR camera, high sensitivity in total darkness, noise, smear and heat proof.

Specifications: Image Sensor= ⅓" SONY Super HAD CCD (see up to 60 ft in total darkness), Resolution = 420 TV Lines, Min. Illum.= .05 Lux (Infrared on), Lens 6.00 mm, DC 12 V, Current Consumption = 500 mA. ONLY wireless cameras include **free** 2.4 GHz receiver (a $160.00 Value)

BC-60WC-DN • $138.00 Wired Day/Night Professional Bullet Camera
BC-60GC-DN • $303.00 2.4 Ghz Wireless Day/Night Professional Bullet Camera

220X DAY/NIGHT ZOOM CAMERA

This color Day/Night zoom camera automatically switches from color to black & white in low-light conditions. Uses Super SONY HAD design to remove electronic holes which reduces noise level. Unique digital slow shutter to allow more light which creates better viewing in low-light conditions. Can be controlled via buttons on camera back. Great for use with our outdoor infrared illuminator. (See pg. 27 for illuminator) Unbelievable picture, highest quality!

Specifications: Image Sensor ¼" SONY Color CCD, Resolution = 480 TV Lines, Min. Illumination = .01 Lux, Lens = 220X zoom, 12 V power, 12 V Power Supply included

PC-220WC-DN • $504.00 Wired Day/Night Professional Zoom Camera

HIGH RESOLUTION DAY/NIGHT COLOR CAMERA - 540 TV LINES W/ WIDE ANGLE LENS

This Infrared day/night waterproof camera is great for short range and outdoor applications. Built with a ⅓" super HAD CCD pick up device and 56 IR LEDs, allow the camera to see up to 150 feet at night. Video is recorded in high resolution at 540 TV lines. This camera and the BC-49WL are the highest quality professional cameras we carry. Video is recorded in high resolution at 540 TV lines.

Specifications: Image Sensor = ⅓" SONY CCD, Resolution = 540 TV Lines, Min. Illum.= 0 Lux (IR on), Infrared LEDs = 56, Lens= 4 mm - 9 mm (can be adjusted from back panel), DC 12 V, 6" × 3½"

BC-61W • $167.00 Wired Day/Night Professional Camera Wide Lens

HIGH RESOLUTION DAY/NIGHT COLOR CAMERA W/ WIDE ANGLE - 650 TV LINES

The new BC-650WC-DN has the newest technology so you get the highest definition image out of this analog camera. The number of pixels in this camera are increased by 30% compared to a standard analog camera.

Specifications: Image Sensor = ⅓" Color SONY Super HAD II Double-Density WD CCD, 36 IR LEDs up to 130 ft. IP66 Waterproof Lens, 2.8 mm - 12 mm Varifocal Picture Elements NTSC 976 × 494, Video Sync. INTERNAL, Resolution/TV-Lines = 650, White Balance = Auto 0 Lux (IR on) Electronic Shutter Auto 1/50 (or 1/60) ~ 1/100,000 second S/N Ratio, More than 48 dB (AGC off) AES Function, Auto Back Light Compensation, AGC Control Flickerless Mode Auto, Power Supply = DC 12 V 400 mA max (IR On), Operating Temp. -10°C ~ 50°C

BC-650WC-DN • $276.00 IR Varifocal Camera

HIGH RESOLUTION DAY/NIGHT COLOR CAMERA - 540 TV LINES

This Infrared day/night waterproof camera is great for outdoor applications. Built with a ⅓" super HAD CCD pick up device and 56 IR LEDs, which allows the camera to see up to 150 feet at night. Video is recorded in high resolution at 540 TV lines. The 9-22 mm DC auto iris varifocal lens which will provide you with wide angle images! This camera and the BC-61W are the highest quality professional cameras we carry.

Specifications: Image Sensor = ⅓" SONY CCD, Resolution = 540 TV Lines, Min. Illum.= 0 Lux (IR on), Infrared LEDs = 56, Lens = 9-22 mm (can be adjusted from back panel), DC 12 V, Dimensions = 6.3"× 3.9"

BC-49WL • $167.00 Wired Day/Night Professional Camera

SPEED DOME CAMERA

This high-tech camera in a rugged weatherproof housing is perfect for indoor or outdoor applications. Full pan/tilt/zoom capability allows for 360° continuous monitoring. It is designed to operate in any weather conditions and has a built-in heater. Perfect for monitoring businesses, buildings, streets, parking lots, etc.

Features: 230 X Color/black zoom camera, ¼" CCD, 480 TV lines, color 0.1 LUX, black and white 0.01 LUX, auto focus, inside 23 X optics/10 X electronic zoom, lens (F=1.5, Zoom= 3.9 mm - 90 mm), auto iris.

PTZ-DOME • $793.00 Speed Dome Camera

HIGH SPEED DOME CAMERA

This high speed dome camera may be used indoors or outdoors and is fully weatherproof. It is designed to operate in any weather condition and has a built-in heater. This camera uses cutting-edge technology including a high performance camera with a PTZ lens, rapid positioning, the ability to automatically adjust to changes in light and object distances, 360° continuous monitoring. Perfect for monitoring businesses, buildings, streets, parking lots, etc.

Features: 128 preset arbitrary storage, orientation exactitude, 360° continuous monitoring, speed: 0.5º-280º (64 level shift) without blind spot, vertical orientation is 180°, 216 X color/black IR zoom camera, ¼" CCD, 480 TV lines, color 0.1 LUX, black & white 0.002 LUX, IR(on) 0 LUX, auto focus, inside 18 X optics/12 X electronic zoom, lens (4.1 mm - 73.8 mm), auto iris.

PTZ-DOMEHS • $1,836.00 High Speed Dome Camera

Dome Cameras

Dome cameras are similar to board cameras built-into a dome housing. These domes are equipped with high-power infrared LEDs for use indoors, outdoors and in low-light conditions. Sleek and unassuming, perfect for many locations.

DAY AND NIGHT CCTV SURVEILLANCE DOME CAMERA

Specifications: Image Sensor= ⅓" SONY Super HAD CCD Sensor, Picture Elements NTSC 542 × 492 / PAL: 542 × 582, Video Sync = INTERNAL, TV-Line = 480, 3.6 mm Lens, 24 unit IR LED 850 nM, White Balance Auto, Sensitivity 0.3 Lux/F 1.2, IR Distance 50 ft. / 15 meters, Electronic Shutter Auto 1/50 (or 1/60) ~ 1/100,000 second, S/N Ratio More than 48 dB (AGC off), Video Signal Output 1 vp-p, 75 Ohms, AES Function Auto, Back Light Compensation Auto, AGC Control Auto, Flickerless Mode Auto, Power Consumption AC24V: 3.7 W / 0.5 A with IR; DC 12 V: 3.36 W / 0.5 A with IR, Operating Temp. -10°C ~ 50°C, Dimensions = 6.5" × 6.5" × 5.5", Approximate Weight = 2 lbs.

DC-480WC-DN • $94.00 Wired Indoor Day/Night Surveillance Dome Camera

Bug Detectors - Phone Recorders & GPS

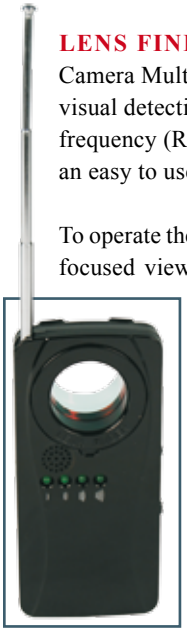
If you think that someone is listening to your conversations or is watching you with a hidden camera, a bug detector will help you find the hidden microphone or camera. Our bug detector acts as a sweeper. You can turn it on, walk through a room and find any hidden devices. If any frequencies are detected the bug detector will notify you. The frequency detector must be within one foot of a wireless device before it can determine the frequency. Both detectors have a strength meter which measures how close you are to the bug. When searching your home or office for bugs be sure to search everywhere. Bugs come in many shapes and sizes some being smaller than a penny.

FREQUENCY DETECTOR WITH STRENGTH METER
This detector has the latest technology in hand-held radio frequency detection. Built-in signal strength meter lets you know when your LCD screen displays actual frequency that is being detected. Full detection range from 1 MHz to 3 GHz. If you already know the location of the bug, this device is for you. It will tell you what frequency the bug is running on.

Specifications: Frequency Range = 1 MHz to 3 GHz, Battery = 5 × AA 600 M/AH NiCd, Battery Life = 6 Hours in use/500 stand-by, Ant. Impedance = 50 Ohms Frequency, Display=10 Digit Liquid Crystal, Silent Alert Mode = Yes, Beeper = Yes, Low Battery Indicator = Yes, Barograph = Ultra Sensitive 5 Sections, Telescopic High/Low Frequency Antenna, Dimensions = 3.3" × 2.7" × 1.2"

Includes: Detector, Charger, Telescopic High/Low Frequency Antenna

AVD-110 • $184.00
Frequency Detector with Strength Meter



LENS FINDER BUG DETECTOR - The Wired or Wireless Camera Multifunctional Detector combines the latest laser frequency visual detection methods, as well as detecting the wide band radio frequency (RF) of wireless video and/or audio transmitters (bugs), in an easy to use hidden bug detector.

To operate the visual detection feature simply look through the specially focused viewing port, and any camera lenses within a 10 foot range will appear to flash red, giving away their location. For wireless detection, just slide the control switch to the RF mode and wave it around the room and objects like you were dusting them off. For different environments, modulate the sensitivity tuner for distance adjustment

Specifications: Requires 2 AAA Batteries, Comes with lens cleaning cloth, Dual strength indication, Sound and Vibrate/LED, Switchable Sound/Silent detection, RF Frequency Detection 1 Mhz - 6 Ghz Dimensions = 4" × 2" × ½"

AVD-272 • $180.00
Multifunctional Camera Detector

BUG DETECTOR WITH STRENGTH METER - High quality hand held bug detector great for detecting wireless audio/video products. Built-in signal strength meter and sensitivity control. Full detection range from 1 MHz to 3 GHz.

Specifications: Frequency Range = 1 MHz to 3 GHz, Battery = 5 × AA 600 M/AH NiCd, Battery Life = 6 Hours in use/500 stand-by, Ant. Impedance = 50 Ohms, Real Frequency Display= 30 Hr., Time Lapse Frequency Display= 960 Hour., Silent Alert Mode = No, Beeper = Yes, Low Battery Indicator = No, Barograph= Ultra Sensitive 5 Sections, Dimensions = 3.9" × 2.75" × 1.2"

Includes: Bug detector, Antenna, and Charger

AVD-101 • $281.00 Bug Detector with Strength Meter

The **GPS-TRACKER** is the smallest GPS unit in the world; about 2" by 1.5". Includes a built-in 3D motion sensor for motion detecting. Track for 12 days before recharging; it has the longest lasting battery on the market today. *USES FOR THE GPS TRACKER; Child Safety, Teen & Young Adult Safety, Driving Safety, Pet Safety, Worker Safety, Asset Protection, Elderly Adult Safety*

Two tracking panel options SMS and Monthly Plans that allow you to choose which plan will work best for your situation. Monthly 5-M Limited Tracking Plan; 5 Minute Tracking $29.95 for 5,000 check-ins. Paid when you activate. The SMS is an option that is only needed if you are going to be using your cell phone for locating. There is a 1 time activation fee of $49.95 that you pay once you receive the unit. You can use your cell phone to locate the device. It will warn you when your GPS enters or leaves any area you've defined. It will also alert you when the Panic Alarm has been pressed giving the device's location, or when the battery is low.

Features: Durable, lightweight, water-resistant device that fits in the palm of your hand. No external antenna. Full power management allows for external DC power source or battery; low power usage and long stand-by time. Location information is reported using a direct GPRS data connection, Internet/Phone mapping using the latest cutting edge 3D maps from Microsoft. Press the SOS/Emergency Alarm button and send an alert via email or a phone number, GPS assist function using GSM network, boosts sensitivity if signal is temporarily lost, enhanced sensitivity for indoor and outdoor reporting.

Specifications: Battery= Li-Polymer 1300 mAh, 3.7 V, Stand-by time without reporting= 300 to 400 Hours, 5 minutes reporting: 100 to 150 Hours, 10 minutes reporting: 150 to 200 Hours, Water Resistance Follows IPX5 Standards, Weight 60 grams, Dimensions= 2.63" × 1.57" × .5"

GPS-TRACKER • $251.00 GPS Tracker

The **MINI TELEPHONE RECORDER** is a small, easy-to-use audio recording device that lets you record phone calls. Plug the Mini Telephone Recorder directly into your phone jack to record any phone conversation. It has a built-in speaker with adjustable volume for playback. The device easily fits next to your home or office phone letting you discreetly record a phone call without drawing extra attention.

Features: Manual recordings (press button to start recording) or automatic recordings (start when a phone call begins), Records high quality WAV files to SD card, Manage recordings in real time; Record and playback calls directly from this device, Up to 560 hours of recording on a 8 GB SD Card; All calls are time/date stamped to let you quickly skim through recorded phone calls, automatically overwrites earliest recorded phone calls to make space for new recordings

PLEASE NOTE: *The Mini Telephone Recorder Pro can* ***not*** *be connected between a digital phone and a wall-jack. It* ***must*** *be connected between a digital phone and the handset of your phone to convert a digital signal to analog. The handset option can be used to record a phone call on a digital phone line. You* ***can not*** *use this device to covertly record a phone call on a digital phone- the handset must be connected to the phone and will be clearly visible.*

Specifications: Recording Format= SD Card, Power Supply= Battery and AC Adapter, No Computer Required, Connects directly to analog line or to digital/IP telephone handset cords, Automatic start, stop and record with Rapid search and playback controls, LCD displays for all call information, time and date stored, Dimensions= 2.5" × 4"

Includes: Mini Telephone Recorder, 8 GB SD Card, Replaceable 2 LR44 Button-Cell Batteries, AC Power Adapter, Telephone Cord, and User Manual

IP Cameras & Board Cameras

WIRED INDOOR/OUTDOOR INFRARED IP CAMERA - You can login remotely and view or playback video. You can also set-up email to notify you of motion. Includes set-up and viewing software that supports up to 16 cameras. Power adaptor included with all IP cameras. Unlike analog cameras, IP Cameras can plug directly into your computer or DVR. They use an IP address to transmit video through a network using Ethernet/CAT5 cable. Little to no additional hardware is required, reducing your system cost. It also has a video output and plugs directly into your DVR, Computer, or even VCR.

Features: Weatherproof IR Day/Night IP Camera, IR distance= 60 ft, Water Resistance= IP66, Video Compression MPEG4

Specifications: Image Sensor= ⅓" CCD, Horizontal, Resolution = 420 TV Lines, Pixels: 704 × 576, Uses Windows 2000/XP Linux, LEDs: 23, Board 6 mm Lens, S/N Ratio = 48 dB (AGC OFF), Composite Video Out (1.0 Vp-p, 75), DC 12 Volt, 350 mA, Dimensions= 7¾" × 2½" × 2½"

IP-223W-IR • $383.00 Wired Indoor/Outdoor Infrared IP Camera

HIGH RESOLUTION COLOR CMOS CAMERA WITH AUDIO - Very small audio/video camera. High Resolution CMOS camera. CMOS technology that virtually matches CCD quality at half the size. Plastic ABS enclosure.

Specifications: Image Sensor = ⅓" CMOS, Resolution 400 Lines, Min. Illumination = 1 Lux (Color), Lens: 6 mm (Color), Current Consumption = 26 mA Max, Power Supply= 9 Volt. Dimensions= ¾" × ¾"

BD-127WC • $43.00 Wired Camera with Plug & Play

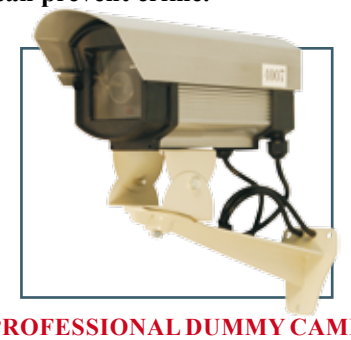
Dummy Cameras

Dummy cameras are non-functioning security cameras that are just as effective of a deterrent as real surveillance cameras. With a blinking red LED and fake power cords, they look just like real cameras. Although dummy cameras won't catch a criminal, studies have shown that just the presence of a camera can prevent crime.

The **DOME DUMMY CAMERA WITH FLASHING LED** looks just like the real thing. Real camera housing without the camera. Features a flashing LED and metal mounting bracket. Installs easily using stainless steel screws. This unit contains a flashing red LED light which draws extra attention to the camera, particularly at night.

Specifications: Base measures 3 ⅞" across and the dome is 2¾" high. Operates on 2 AA batteries (not included).

DM-DOML • $16.00
Dome Dummy Camera w/Flashing LED



The **PROFESSIONAL DUMMY CAMERA WITH FLASHING LED** looks just like the real thing. Real camera housing without the real camera. Features a flashing LED, real video cable, weatherproof aluminum housing, and fully adjustable metal mounting bracket. Installs easily using stainless steel screws.

Specifications: Dimensions= 10" × 4" × 4" (bracket 10"). Operates on one C battery (not included) - Will operate for approximately six months on one battery.

DM-PROFlash • $26.00
Professional Dummy Camera

The **PROFESSIONAL DUMMY CAMERA** looks just like the real thing. Real camera housing without the camera. Features a flashing LED, real video cable, weatherproof aluminum housing, and fully adjustable metal mounting bracket. Installs easily using stainless steel screws.

Specifications: 10¾" long (rain shield extends 2") × 4" round. Operates on 2 AA batteries (not included).

DM-PROL • $23.00
Professional Dummy Camera w/ LED
